

YYJLocalsForLocals Laravel Development Environment

Included in this environment

Laravel 7

I've added the Argon Dashboard Laravel:

- [Laravel Package](#)
- [Argon Dashboard Laravel](#)

MariaDB

- [A free and open source version of MySQL, widely used and supported](#)

PHP Composer

More stuff ...

How to run this environment

1. [Install Docker](#)
2. Clone this project / repo:

```
git clone ...
```

3. Using a terminal navigate into the directory where you have cloned the project:

```
cd /location/of/your/project
```

4. Install the Argon Dashboard styles and presets: In your project directory:

```
php artisan ui vue --auth  
php artisan ui argon  
php artisan migrate --seed  
npm install && npm run dev
```

5. Start the environment with **docker-compose**

```
docker-compose up --build
```

6. [Navigate to: http://localhost:3000](http://localhost:3000)
